

# TOOLBOX TALK

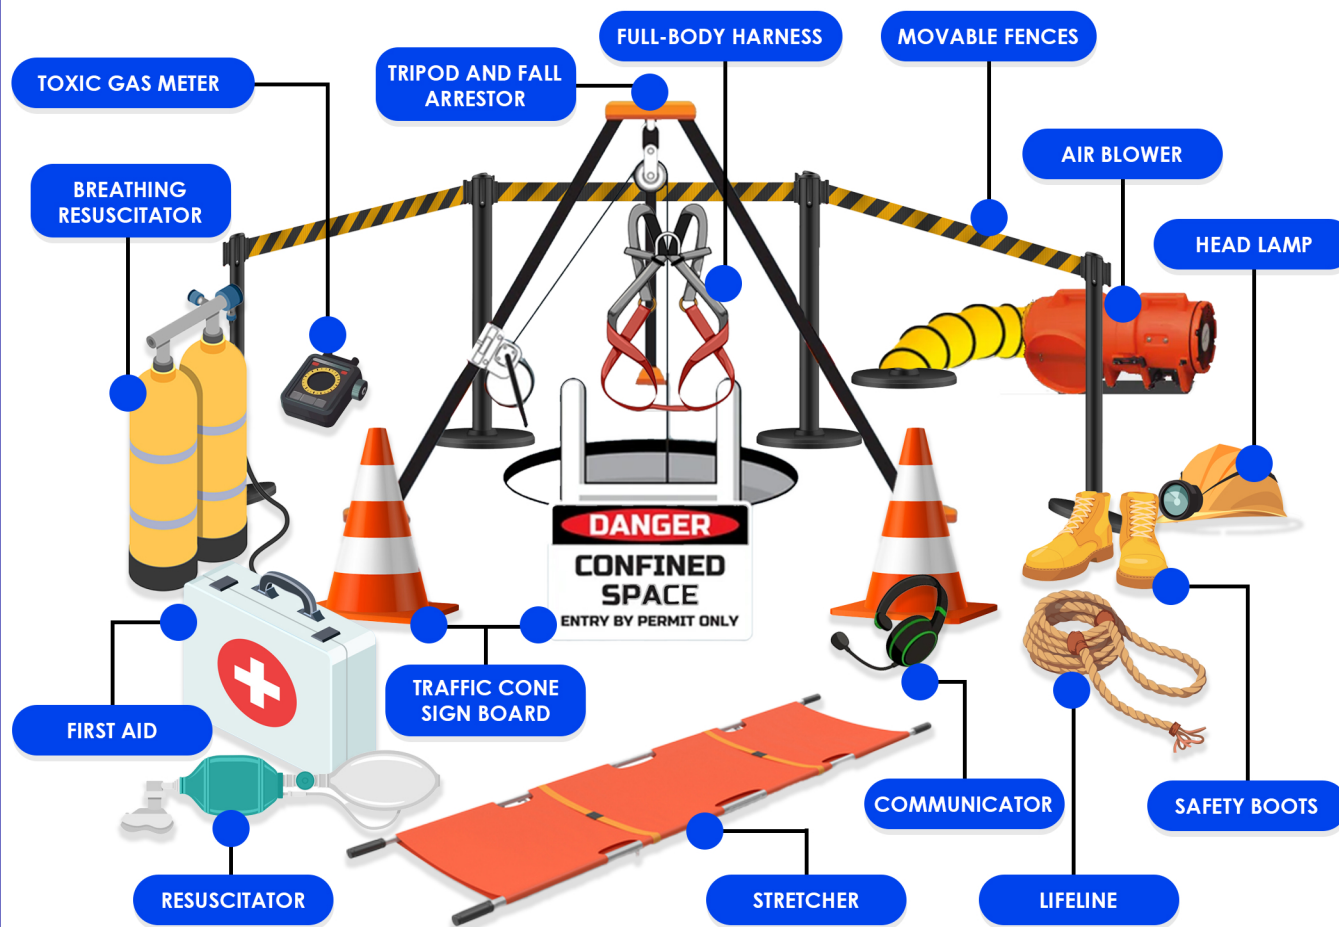

## SAFETY EQUIPMENT CONFINED SPACES

When working in confined spaces, the right equipment isn't optional — it's lifesaving. Every item plays a role in protecting workers, preventing accidents, and ensuring that if something goes wrong, help is close at hand.

1. What is the first thing you should do before using any safety equipment?
2. Why is it important to have rescue and first-aid equipment on site?
3. What equipment is essential for safe entry and rescue in confined spaces?

## EQUIPMENT TO KNOW:

## SAFETY REMINDERS:

INSPECT

all equipment  
before use

ENSURE

rescue equipment is  
always on site and  
accessible

TRAIN

every worker on how to  
properly use and  
maintain this  
equipment

NEVER ENTER

a confined space or work  
at height without fall  
protection and monitoring
